Essen, 14 May 2024

Detlef Brüggemeyer to become new technical managing director of OGE

OGE has successfully arranged the succession for the position of technical managing director: OGE's Supervisory Board has appointed Detlef Brüggemeyer as a member of OGE's Management Board.

Detlef Brüggemeyer has worked for the company for more than 20 years in various positions, currently as Head of Network Planning and Dispatching. He was previously responsible for infrastructure projects in the technical department as well as asset management. On July 1, 2024, Detlef Brüggemeyer will take over the technical department at OGE as a member of the management board.

Lincoln Webb, chairman of the supervisory board of OGE, said: "With Detlef Brüggemeyer, we have been able to recruit an outstanding manager from our own company for the management of OGE - with him, we are demonstrating that we will continue to consistently pursue our chosen path of transformation. Detlef Brüggemeyer is an experienced manager and, as an OGE native, not only brings a very high level of technical expertise, but also comprehensive knowledge of our entire network structures. With him, we are ideally positioned for the future."

Dr. Thomas Hüwener, future spokesman of the management board of OGE, added: "I am delighted that the supervisory board has appointed an exceptionally experienced infrastructure manager to the Management Board of OGE. He is not only a proven expert in gas transportation, but also a seasoned personality. I am very much looking forward to tackling the future challenges together with Detlef Brüggemeyer. OGE is facing decisive years: both in the development of the hydrogen core network and in the CO₂ transport system. Together with the OGE team, we will shape the future of OGE and make a significant contribution to the transformation of the energy system."

Detlef Brüggemeyer commented on his appointment: "For many years, I have been part of a strong team that has been driving OGE forward together. We stand for competence, reliability, and safety. As technical managing director, I look forward to continuing to guarantee security of supply with our team and at the same time successfully driving forward the expansion of the hydrogen network and the development of the CO₂ transportation system."

About OGE

OGE is one of Europe's leading transmission system operators. With our approximately 12,000 kilometers of pipeline network, we transport gas throughout Germany and, due to our geographical location, we are the link for gas flows in the European single market. Our more than 2,000 employees stand for security of supply. We make our network available to all market participants on a non-discriminatory, market-oriented, and transparent basis. We shape energy supply. Today and in the energy mix of the future. For more information about the company, please visit www.oge.net. www.oge.net.
